Linli Shi

ETH Zürich | UniDistance Suisse | Zürich, Switzerland

linli.shi@math.ethz.ch • linli-shi.github.io

Academic Appointment

ETH Zürich and UniDistance Suisse — Sep 2025–present
Postdoctoral Researcher; based at ETH Zürich — Zürich, Switzerland

Mentors: David Loeffler and Sarah Zerbes.

Education

University of Connecticut — Aug 2018–May 2025
Ph.D. in Mathematics; advisor: Liang Xiao — Storrs, CT

On leave during the 2020–21 and 2023–24 academic years; visiting graduate student at:
- Beijing International Center for Mathematical Research, Peking University (Sep 2020–Jul 2021)
- Morningside Center of Mathematics, Chinese Academy of Sciences (May 2023–Jul 2024)

Capital Normal University — Sep 2015–Jun 2018
M.S. in Mathematics — Beijing, China

University of Electronic Science and Technology of China — Sep 2010–Jun 2014
B.S. in Electronic and Information Science and Technology — Chengdu, China

Research Interests

Number theory, **automorphic forms**, **and arithmetic geometry**, with particular emphasis on Beilinson's conjectures, Euler systems, the Kudla program, and the relative Langlands program.

Papers and Preprints

[1] **On higher regulators of Picard modular surfaces.** arXiv:2510.08708. Submitted.

In preparation

[2] **Adelic Borcherds lifts and Borcherds products.** Joint with Wenxuan Qi, Liang Xiao, and Yichao Zhang.

[3] **Theta lifts in higher Chow groups.** Joint with Wenxuan Qi, Liang Xiao, and Yichao Zhang.

[4] **On higher regulators of orthogonal Shimura varieties.** Joint with Wenxuan Qi, Liang Xiao, and Yichao Zhang.

[5] **On regularized linear periods.** Joint with Pierre-Henri Chaudouard.

[6] **Higher Hida and Coleman theory on** $\mathrm{GU}(2,1)$**.** Joint with Zhengfu Chen.

Invited Seminar Talks

Motivic Theta Lifting and Beilinson's Conjectures

University of Münster, Mittagsseminar zur Arithmetik *(scheduled)* — Dec 8, 2026
University of Wisconsin–Madison, Number Theory / Representation Theory Seminar (online) — Oct 22, 2026
UCLA, Number Theory Seminar — Oct 5, 2026
Caltech, Algebra, Geometry and Number Theory Seminar — Oct 1, 2026
UC Berkeley, RTG Arithmetic Geometry and Number Theory Seminar — Sep 28, 2026
Columbia University, Automorphic Forms and Arithmetic Seminar — Sep 11, 2026

Regularized periods of some Eisenstein series

Purdue University, Automorphic Forms and Representation Theory Seminar — Jan 16, 2025

On higher regulators of Picard modular surfaces

University of Florida, Algebra Seminar — Dec 3, 2024
UC San Diego, Number Theory Seminar — Nov 20, 2024
Boston University, Number Theory Seminar — Nov 18, 2024
Louisiana State University, Algebra and Number Theory Seminar (online) — Nov 5, 2024
University of Arizona, Algebra and Number Theory Seminar — Oct 15, 2024

Conference and Workshop Talks

Modularity in Higher Chow Groups and Beilinson's Conjecture — Jun 2026

ETHZ–UZh–Sbg Arithmetic and Geometry Research Group, Alpbach, Austria

On higher regulators of Picard modular surfaces — Jan 2025

Joint Mathematics Meetings, special session on L-functions and automorphic forms, Seattle, WA

Teaching Experience

UniDistance Suisse

Recitation Instructor (Teaching Assistant)

Number Theory — Fall 2026
Linear Algebra I — Spring 2026

University of Connecticut

Teaching Assistant

Mathematics for Business and Economics — Fall 2022; Spring 2023; Fall 2024; Spring 2025
Multivariable Calculus (recitation sections) — Spring 2020; Fall 2021; Spring 2022
Calculus II — Fall 2019

Mentoring

Thesis supervision at ETH Zürich; master's theses co-supervised with Sarah Zerbes.

Master's theses: Helena Busenhart and Felix Stäheli (Fall 2026); Leon Dahlmeier (Spring 2026); An Khanh Dao (Fall 2025).

Semester thesis: Felix Stäheli (Spring 2026).
